Enforcement Agency Approval

Findings

- A. This facility is an existing (since 1965) 19 acre Class II landfill utilizing the trench and area method of operation. Remaining site life is estimated to be one year. This facility receives approximately three tons per day of Group II and III wastes and is open for use twenty-four hours a day, seven days per week. Salvage operations are conducted. Types of wastes received at the site include:
1. Residential waste
 2. Commercial waste
 3. Construction/demolition waste
 4. Agricultural waste
- B. Design and operation of this facility prior to October 16, 1978 were conducted as specified by the Report of Disposal Site Information dated October 16, 1978, which is hereby made a part of this finding. There will be significant change within the next five years at which time the site will either be modified or closed.
- C. The following documents condition operation of this facility:
1. Rubbish Dump Permit No. 6-0200.
 2. California Regional Water Quality Control Board, Colorado Region: Waste Discharge Requirements No. 75-19.
- D. This facility's design and operation are currently in substantial compliance with State Minimum Standards for Solid Waste Handling and Disposal as determined by physical inspection made on May 9, 1979, except as it relates to Sections 17648, 17679, 17682, 17685, & 17711.

This permit is granted solely to the operator named above, and is not transferable. Upon a change of operator, this permit is subject to revocation. Upon a significant change in design or operation from that described in this permit or in attachments thereto for the existing design and operation of a facility operating immediately prior to August 15, 1977, or from the approved intended design and operation of a facility which was not operating prior to August 15, 1977, or which herein is granted a permit modification this permit is subject to revocation, suspension, modification or other appropriate action.

This permit does not authorize the operation of any facility contrary to the State Minimum Standards for Solid Waste Handling and Disposal. This permit cannot be considered as permission to violate existing laws, ordinances, regulations, or statutes of other government agencies.

- E. This permit is consistent with the San Bernardino County Solid Waste Management Plan and with the State Minimum Standards for Solid Waste Handling and Disposal.

CONDITIONS:

A. Requirements:

1. This facility must comply with the State Minimum Standards for Solid Waste Handling and Disposal.
2. This facility must comply with all federal, state, and local requirements and enactments.
3. Additional information concerning the design and operation of this facility must be furnished upon request of the enforcement agency.

B. Prohibitions:

The following actions are prohibited at the facility:

1. Scavenging
2. Disposal of hazardous wastes
3. Disposal of large dead animals
4. Disposal of septic tank pumpings
5. Unapproved open burning
6. Disposal of infectious wastes

C. Specifications:

No significant change in design or operation from that described in Item A and B of the Findings is allowed, except for those changes which are required under the Conditions portion of this permit.

D. Provisions:

1. Operation of the site shall be effectively supervised to insure compliance with the State Minimum Standards.
2. The finished areas of the fill shall be graded to prevent soil erosion and exposure of refuse, and to achieve a neat general appearance.
3. Apply a minimum of 6" of a suitable cover material every ninety-six hours.
4. A final cover of a minimum of two feet of compacted soil shall be applied to all finished areas of the fill.
5. Litter shall be collected as quantity and wind conditions dictate.
6. This permit is subject to review by the enforcement agency, and may be suspended, revoked, or modified at any time for sufficient cause.

E. Monitoring Program:

The following items shall be monitored by the operator of this facility or his agent. Records including but not limited to these items shall be kept and made available to the enforcement agency upon request:

1. The operator shall maintain records of the weights or volumes of refuse received. Such records shall be accurate to within 90 percent of the true value.
2. The operator shall maintain an accurate map record of the location of any cuts made in natural terrain as well as the location of areas where fill has been placed.
